Page 1

This is one of a group of buildings built in 1944 between A Street and the anchorage apron with access off 7th Street. The 1600 square foot structure was built at a cost of \$2400.00 following Civilian Conservation Corps plans. It is of "Semi-Permanent" construction type.

Rectangular in plan, building 1808 measures 20 feet-7 inches by 80 feet-7 inches. Its interior plan consists of a double-loaded central corridor accessing 11 small rooms. The building's foundation and floor are of concrete, the framing of wood with drop-lap wood siding, and the gabled roof of asphalt roll roofing. The windows are mostly 6 or 9 panes, fixed wood sash types. The doors have 4-pane upper panels with 3 horizontal lower panels. All of the trim is from flat, 1-inch stock. The building appears to be structurally sound.
